PRIZES AND AWARDS

Professional products of the Rosafilo brand have won numerous industry awards.

ROSA – The rose is a beautiful, subtle and mysterious plant. For centuries it has been a powerful symbol of religious, cultural and romantic experiences. Today it has become a component of unique products such as ours. Our fascination with high-class natural cosmetics began with the wild roses that grow by the Baltic Sea.

FILO – stands for our feeling towards life, beauty and nature. It represents our attraction to rose petals and other natural treasures included in our cosmetic artifacts. It shows our dedication to create 100% natural cosmetics of the highest quality.

So this is how the name **ROSAFILO** was born.

BODY SCRUBS

SAFE, NATURAL COMPOSITION

Our cosmetics are distinguished by a purity of their composition — they are made only of natural products such as shea butter, pine oils, orange or jasmine flowers, Himalayan salt, cane sugar, babassu oil and others. They are safe for the skin with no chemical and artificial additives. Our products can be applied to all skin types.

ALLURING AROMAS OF ESSENTIAL OILS

The composition of each cosmetic body scrub offered by us includes natural essential oils that provide a unique fragrance during care at home or hotel SPA. What's more, due to their properties, they facilitate relaxation during the treatment — aromatherapy is used to cleanse the head and forget about everyday problems. Your body will relax properly when you use the scrub on your skin, and your head will rest, focusing on a pleasant feeling at moments devoted only to yourself. Citrus, mint, pine, cinnamon — clove or maybe a little black coffee — what kind of fragrance will you choose for yourself?

VARIOUS FUNCTIONS OF OUR COSMETICS

The basic function of every body scrub is to exfoliate dead epidermis, which makes the skin cleansed and moisturized, stimulated to produce a new layer. Our natural artifacts, due to the presence of different active ingredients, can serve different purposes. Thus mojito and lime sugar body scrubs refresh, pine and abies salt body scrub regenerates, whereas amber sugar body scrub has some firming properties.

Rose petals in combination with Himalayan pink salt, shea butter, babassu oil, argan oil, sweet almond oil and natural rose oil cause our skin go through the next stages of regeneration - from exfoliation and removal of dead epidermis, to smoothing wrinkles and increasing the skins firmness until it is relaxed and moisturised.
